To all individuals purchasing a NH License to fish for northern shrimp:

With this being the first year of a Commercial Shrimp License in New Hampshire, I wanted to provide a brief explanation of why this license was implemented and to make you aware of certain previous management actions that may or may not affect your decision to purchase this shrimp license.

First of all, you will need this license to take, possess, land, or transport northern shrimp on New Hampshire waters by any method for the purpose of sale, regardless of where the catch was taken. **Purchasing a Commercial Saltwater License will no longer cover these activities for shrimp fishing.**

Next, as most of you know, northern shrimp has been managed cooperatively by the states of New Hampshire, Maine and Massachusetts under the Atlantic States Marine Fisheries Commission (ASMFC) since the 1970’s. Currently this is one of the last open access fisheries (where anybody can attain a license to participate) in the northeast. In recent years it has become apparent that the number of individuals participating in the fishery is not sustainable both biologically and on an economic basis. While the number of New Hampshire vessels/individuals fishing for shrimp has remained somewhat stable, the number of shrimp license holders in Maine has increased substantially. As a result, the ASMFC Northern Shrimp Section has taken two actions:

1. Initiated development of a management action to limit participation in the fishery
2. Approved a control date of June 7, 2011.

The license was implemented because NH is the only state without a Commercial Shrimp License; and without a license specifically for shrimp we could not limit participation in the fishery.

The control date of June 7, 2011, was established by the Northern Shrimp Section to inform the shrimp fishing industry that individuals/vessels without shrimp fishing history prior to the control date may be treated differently than those with history before that date in a future management action. I want every individual purchasing a New Hampshire commercial shrimp license in 2014 to consider this as you decide whether to purchase the license; particularly if you or your vessel does not have shrimp landings history prior to the control date. While the shrimp license is currently open access and anyone can purchase it, there is a potential that the management action under development may result in a requirement to limit the number of individuals/vessels who are eligible to purchase the license and the control date may be used as one of the criteria to determine who is eligible.

I also would like to encourage every person purchasing the new Commercial Shrimp License to include their email address on the application so we can provide you with notices of meetings and rules hearings pertaining to shrimp management in a timely and efficient manner.

If you have questions about this, please don’t hesitate to contact me or other Marine Division staff at the Region 3 office in Durham (868-1095).

Regards,

Douglas Grout
Chief of Marine Fisheries
APPLICATION FOR COMMERCIAL SHRIMP LICENSE

(RSA 211:49-e)

To take, possess, land, or transport northern shrimp for the purpose to sell. This license is issued to an individual.
